

Free Clinic Day

Saturday, May 12, 2012

Free Hearing, Speech and Vision Screenings

For Children: It is important to identify hearing, speech and vision problems as early as possible. Children who hear, speak and see well will grow and develop to their full social, emotional and academic potential.

Free Hearing Screenings

For Adults: Adults often deny their hearing loss. Left untreated, hearing loss causes many adults to become isolated from others and increases anxiety and depression. It is important that adults monitor their hearing on a regular basis.

Date: Saturday, May 12, 2012
Time: 8am – 1pm (appointment required)
Place: Center for Hearing & Speech
9835 Manchester Road
St. Louis, MO 63119
